

HI-GEST

HI-GEST CAA/M16/FA/00514
Organic Bio Digester

HI-GEST is the mixture of aerobic and anaerobic marine microbes for use in Shrimp ponds. The species selected are eco-friendly and non pathogenic to Shrimp and other plankton population. These selected microbes rapidly digest the uneaten feed, fecal matter, dead algae, etc. and withstand wide range of salinities, pH and DO.

BENEFITS

- 🐟 Improve pond bottom environment
- 🐟 Release obnoxious gases
- 🐟 Digest, oxidise and mineralize organic waste
- 🐟 Maintain optimum pH, Algal bloom and DO level
- 🐟 Improve overall health and growth of Shrimp

CONTENTS

Mixture of marine microbes 5 x 10¹¹ cfu / kg

Rhodococcus sp1

Rhodococcus sp2

Rhodobacter

Bacillus substilis

Bacillus licheniformis

Yeast Cell Wall	200 mg / g
-----------------	------------

Rice Bran	300 mg / g
-----------	------------

Precipitated Silica	25 mg / g
---------------------	-----------

DOSAGE and APPLICATION:

- 🐟 Mix 2 Kg of HI-GEST with 20 litres and apply all over the pond of one hectare. Apply once in 10 days as advised by technician.

PRODUCT FORM AND PACKING:

- 🐟 HI-GEST is a light brown coloured dry powder and is available in 1 Kg pack.

STORAGE:

- 🐟 HI-GEST should be stored in a cool dry place. Open bags should be resealed after use.
