

O-MINE

O-MINE CAA/M16/FA/00514
An Organic Solution

O-MINE, a supplementary dietary product, is a combination of organic trace minerals especially for Prawn / Fish culture. O-MINE is effectively utilized by Prawn/Fish and also by both Phyto and Zoo planktons. O-MINE is effectively absorbed into the prawn's body through osmoregulation. Organic minerals in O-MINE do not interact with each other.

AQUATIC ANIMAL USE ONLY | NOT FOR HUMAN CONSUMPTION | FREE FROM ANTIBIOTICS

BENEFITS

- Safe and effective. Does not pollute the pond water
- More bioavailability than inorganic minerals.
- Smaller quantities are enough to achieve higher performance.
- Higher absorption and adsorption
- Improves animal health and quality
- Acts as a prebiotic.

INGREDIENTS :

O-MINE is composed of Proteinates and Amino Acid Chelates of essential minerals with free flowing, anti-caking agents

Zinc	0.220 g	Selenium	0.325 mg
